In the UK **rain** is always around the corner, so keeping your flat roof leak free is vital. But now there is a **stylish high performance** solution, that will keep the water **out** of your property **for good**.

---

# Flat Roofing

Britelite are delighted to introduce our newest addition to the range which is the Ultimate Flat Roof. It is a GRP roofing system that's built to last. With full BBA certification and a solid guarantee, a wide range of colours and finishes and independently proven low environmental impact. Britelite's Flat Roofing is the finest roofing system money can buy. It is only fitted by our trained and approved installers. We provide a free of charge survey and quotation for almost any project of any size. All of our workmanship is guaranteed so you can have complete peace of mind.

Our installer will strip a roof right back to the joists and fix on new OSB3 18mm decking with or without insulation

in the build up. Pre-form GRP edge trims are fitted to finish the sides, then our installers lay a hard wearing, heavy duty Britelite GRP laminate onto the surface, as standard.

Once it's cured Britelite then coats the roof with our high performance roofing top coat.

Britelite's Flat Roofing is versatile and flexible for new build roofs, replacement roofs, listed or iconic buildings.

We will only ever use fully trained installation teams so we can ensure the workmanship meets the high standards of our Ultimate Roofing system.

All of our Flat Roofing is fire retardant and completely UV resistant and comes in many different colour combinations as well as specialist finishes.

With our commitment to the environment we are also proud our system is sustainable by design and safe to install. As we use no heat, it has even been rated as A/A+ in the generic BRE Green Guide.

Britelite Flat Roofing offers a ultimate BBA Certified fibreglass flat roofing system. Our GRP (also known as fibreglass) roofing systems are installed by our fully trained and approved installers and are supplied with a solid guarantee from a name you can trust.

So don't delay and get your Flat Roofing quote today!

# Balconies, Walkways and Stairs

For heavy-duty applications such as balconies, walkways, terraces, roof gardens and steps, Britelite Flat Roofing provides an extra level of performance and waterproof protection on areas subject to frequent foot traffic. The system is fitted with a choice of our coated aggregate finish which is available in any of our standard colour options or matched to most RAL or BS4800 colours or our anti-slip finish for extra grip in wet conditions. Balustrade supports, tiles or decking can be easily incorporated into the system providing limitless possibilities for your next project.

# Britelite Flat Roofing and Lanterns

# Green Roof

Britelite's Flat Roofing can be turned in to a totally bespoke green roof\* based exactly on your requirements. You can also opt for one of our low maintenance sedum green roofs. As well as creating a naturally beautiful area, Britelite green roofs add sound insulation and deliver energy savings. They will protect your property from internal temperature fluctuations in the summer and winter months.

\*Green Roofs cannot be installed onto an existing Flat Roof system unless it is replaced with a Britelite Flat Roofing system. Subject to structural calculations.

# Roof Lanterns

Britelite Roof Lanterns are a perfect solution for a new build traditional Orangery, extension or can be inserted into a new Britelite Flat Roof to help give you the feeling of light and space.

Whether your new living space is for a dining room, kitchen, living room, bedroom or bathroom, the Britelite Lantern Collection is a perfect, elegant solution for your home.

The lanterns will enhance any home – traditional or modern. Its strong ridge reduces the need for multiple

bars, allowing you to use the maximum amount of glass which lets light flood into your room.

## Sizes

Our lanterns are available in a wide range of rectangular sizes up to 4m x 6m.

## Colour Options

Get the WOW factor by choosing Aluminium Anthracite Grey or Satin Black colour options to match with the latest bi-fold doors or White PVC to match with modern window frames. Internally, the lantern roof can be clad in White PVC or upgraded to Anthracite Grey or Satin Black to either match or contrast with your chosen external finish.

## Glazing

Choose highly efficient thermal glass to help reduce heat loss and noise pollution in your new living space. This will let the required amount of light into your room.

## Roof Vents

Why not add a roof vent to let in fresh air – roof vents are available with manual and automatic openers with rain and temperature control.

# Flat Rooflight

Give a home extension more light with the Britelite Flat Rooflight.

Creating the illusion of open roof space, the minimalistic external and internal sightlines creates a sleek, modern appearance and is a stunning addition to any home extension.

Thanks to Britelites unique aluminium external and internal capping, with a bespoke structural PVCu internal core, it is not only attractive, but also the best double glazed thermal performing Flat Rooflight on the market.

Our Rooflight is the ultimate glazed Flat Rooflight designed to throw maximum light into any home.
