

# Roofline

**Britelite**  
Windows, Doors & Conservatories

# What is roofline?

On a building, roofline typically consists of:

**A** Guttering and **B** Fascia

Depending on the property style, this may include:

**C** Soffits

In addition to our high-quality basic roofline solutions, we offer these optional extras:

Dry verge

Neaten ragged roof edges for a sleek finish

Eaves protector

Protect eaves and prevent roof felt from sagging

Bird comb

Deter birds from nesting in your roof space

Gutter guard

Prevent leaves from blocking up your gutters

# Why should you update your roofline?

*Above:* The above roofline is made from timber, and is already looking worn and in need of attention. Not only has it the potential to rot away, it will also require painting to keep up its appearance

- ▶ Your fascia and soffits are made from timber, which are worn and/or rotting
- ▶ You want to avoid the hassle of regular maintenance such as sanding and painting your fascia and soffits
- ▶ You have rainwater drainage problems which need solving
- ▶ You want to prevent birds from nesting in areas of your roof
- ▶ You would like your roofline and guttering to match the windows on your property

If any of the above statements apply to your current roofline situation, then we can help.

# Why PVC-U is the best solution

Above: Standard fascia and hollow soffits in Irish Oak, along with black Universal Plus guttering

## ► 20 year guarantee

Our PVC-U roofline is guaranteed for 20 years against warping, cracking and discolouration\*

## ► Low-maintenance

Our roofline products are virtually maintenance-free – unlike timber, weathering won't occur, avoiding the need to regularly paint

## ► 100 % colour-match

A 100% colour-match to your windows, doors and conservatories is achievable when you use Eurocell products across the whole building

\* Applies to white product only. Please ask for guarantees on woodgrain products

All together better

# PVC-U and timber comparison

Before

The timber fascia in the example above has weathered and deteriorated over time. It requires sanding and painting to remain fresh. You can see previous attempts at painting has marked the brickwork

After

The timber has been replaced with Eurocell roofline products, and looks much fresher and brighter than before. This won't need time consuming maintenance such as sanding and painting

# What we can offer you...

## Option 1

This option allows you to replace your old roofline with a superior PVC-U solution. This option features standard fascia with a vented soffit board, and half-round guttering in white. Other styles and colours are also available, so you can choose a combination to best complement the style and needs of your home

Or upgrade to...

## Option 2

Get the full roofline package – a premium product without a premium cost! The above sample shows ogee fascia with hollow soffits and square-line guttering in white. Other styles and colours are also available, so you can choose a combination to best complement the style and needs of your home

# Fascia boards

styles and colour options

- ▶ Standard or decorative ogee fascia board for direct fixing to rafters
- ▶ Designed for ease of fitting and is low-maintenance, with no painting required
- ▶ An attractive improvement to any home

Plain fascia

Give your roofline simple, clean lines with plain fascia boards, available in nine colours to best complement your home

Ogee fascia

Decorative Ogee style fascia has a distinctive, sculptured look to add a touch of class to your home.

## Colour options

Note: Ogee is only available in White

# soffit boards

styles and colour options

Plain soffit

The clean-edged lines of plain soffit board will give a simple, un-fussy look to your property. It can be enhanced with separate vents to maintain airflow through your roof space

Vented soffit

Vented soffit features built-in ventilation – ensuring your roof space is well ventilated at all times, preventing damp and protecting rafters from rot

Hollow soffit

Tongue and groove style hollow soffit is a lightweight, cost-effective product for a more decorative finish to your roofline. Also available with built-in ventilation slots

Colour options

**Note:** vented soffit is only available in White, Golden Oak, Rosewood and Black Ash

# Rainwater systems

styles and colour options

Half-round

This classic design is widely used and is ideal for all residential buildings

White Black Brown Grey

Square-line

A stylish, contemporary design suitable for all residential buildings

White Black Brown Clay Brown

Universal Plus

Ideal for large residential buildings and conservatory roofs

White Black Brown Clay Brown

Universal XL

Ideal for properties with a large roof area, designed to handle high rainwater volumes

White Black Brown

# Cladding styles and colour options

Refresh tired, old brickwork or timber cladding with low maintenance PVC-U cladding available in two styles:

Shiplap cladding

Suitable for both horizontal and vertical installations

Open-V cladding

Suitable for both horizontal and vertical installations

## Colour options

White

Black Ash

Golden Oak

Rosewood

**Note:** Black Ash is not available for the Open-V cladding style

# Quality assured

All Eurocell white profiles carry a 20-year colour fastness guarantee\*

All Eurocell laminated boards carry a 10-year colour fastness guarantee\*

Our roofline products are supplied with up to 20-year guarantee against discolouration, warping and cracking. Plus, Eurocell have a unique colour-match promise across their entire range of products including windows, doors and conservatories as well as fascias, soffits and guttering for a consistent look across your home.

\*The above guarantees relate to Eurocell foam and rigid profiles only and are subject to the product being fitted to the manufacturer's installation recommendations.

All together better

## Example installations

Standard fascia, matching finial and plain soffit boards in White. Black Universal XL guttering has been chosen for an aesthetic contrast

Standard fascia in Rosewood with matching finial. Installation is complemented with Brown dry verge, installed for neater roof edges

## Example installations
