Conservatories

Conservatories are perhaps the most popular way of adding more space to your home and are just perfect at bridging the gap between house and garden.

From start to finish, we guarantee a great experience when having a Britelite conservatory fitted. Once you've chosen your design, our dedicated teams will come in to build the foundations and lay the brickwork. They will then pass on the baton to our top teams who will install the windows, doors and roof, whether it be solar control glass or one of our new tiled roof systems. Finally, our plasterers and electricians will be in to finish the job. Every person involved will be highly professional and dedicated to making your conservatory absolutely perfect for your home.

Britelite conservatories are designed to suit your home. We offer a range of designs and styles from standard sun lounges to more elegant Victorian and Edwardian conservatories, as well as optional extras such as under floor heating and air conditioning.

Want something a little more bespoke? That's no problem either – we can design custom conservatories that take the best elements from each style to make a space that is perfect for you.

With energy efficient glazing and self-cleaning glass available, as well as a range of colours and finishes for the doors and windows, the sky is literally the limit.

We guarantee a great experience when having a Britelite conservatory fitted.

Conservatory Styles

Britelite offers a range of conservatory styles you can choose from:

Sun Lounge Conservatories

This popular conservatory comes in glass-to-ground and dwarf-wall styles. Choose from a variety of comfort options, such as ridge ventilation, roof vents and special heat-reducing roofing materials.

Victorian Conservatories

Featuring a faceted front and curved appearance, this conservatory is perfect for period properties. The steeply pitched roof gives a feeling of space and allows maximum light into the room.

Edwardian Conservatories

With a flat-fronted, contemporary style, this conservatory is suitable for the majority of properties.

Custom Conservatories

Tailored exactly to your needs, pick and choose the perfect features of your new conservatory.

Loggia

The Loggia is more than just a conservatory: it is a truly stylish and beautiful extension to your home and creates a 'real room' feel.

Take the hassle out of building a new extension. The Loggia is a fraction of the price, and doesn't require any Building Regulations, therefore you can enjoy your beautiful new room sooner than you expect. A unique design concept born out of the decadence and architectural beauty of the Renaissance period, the stunning Britelite Loggia is available in a number of finishes and has under floor heating and air conditioning as optional extras.

As well as a design masterpiece, the Loggia's strength and durability is second-to-none. At around 40% cheaper than an orangery, as well as being incredibly well insulated the Britelite Loggia will add value and space to your home.

Glass Extensions

The conservatory has always been an excellent way of blurring the margin between home and garden. Britelite glass extensions take this idea to the next level. Glazing bars in the roof oversail and carry the glass with it, projecting the roof structure beyond the glass wall and into the garden, creating a cocoon-like environment for you to enjoy.

As with all Britelite installations, a glass extension can be designed and styled to compliment your property, and they can be executed in a number of different ways:

- Between two walls of the same length
- Between two walls of varying lengths
- On top of glazed side frames

LivinROOF

LivinROOF is the first roofing system designed to give you the flexibility to combine solid and glazed roofing seamlessly. It helps you extend your living space and enhance thermal performance to give you a room that you can use all year round.

Whether you are constructing a new home extension or replacing an old existing conservatory roof the LivinROOF can give you total design flexibility and the ability to create stylish and thermally efficient rooms like no other solution on the market.

The LivinROOF roofing system is constructed from insulated composite external panels and Kingspan slab insulation, which are strong and robust yet extremely thermally efficient.

The structure of the roof utilises a market leading classic roof system to provide strength and rigidity and with over 1.5 million classic roofs installed throughout the UK you can be sure it can withstand anything mother nature has to offer.

Ultrarroof 380 - Tiled Roof

The '380' in Ultrarroof 380 refers to the box beam which is its most important component. The box beam is 380mm wide and runs around the perimeter of the roof sitting on window frames and walls. This box beam gives the Ultrarroof 380 its super strength, so strong that it never needs a tie bar ever.

Enjoy the benefits of a solid and glass roof all at once by replacing your existing conservatory roof with the Ultrarroof 380. Its hybrid design allows for the inclusion of numerous glass panels – the choice is yours entirely and with glass panels you'll benefit from fantastic light penetration into your new room space.

Maintaining an optimum temperature in your conservatory is easy with the Ultrarroof 380. Its thermally efficient design means that it traps warm air where it is most needed during those colder autumn and winter months while preventing your room from overheating during summer when the sun is at its absolute peak.

The Ultrarroof 380 is light in weight, too. This is important because its design enables it to overcome obstacles typically presented by planning permission and building regulation rules. Because the Ultrarroof 380 has also been JHAI approved, you'll be able to instruct Britelite to proceed with peace of mind.
